## PROHIBITION ON ACQUIRING CERTAIN TELECOMMUNICATION EQUIPMENT AND SERVICES

ection 889(a)(1)(A) of the 2019 National Defense Authorization Act (NDAA) prohibits the federal government from acquiring telecommunications equipment or services from Huawei, ZTE Corporation, Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, or Dahua Technology Company (or any subsidiary or affiliate of such entities). This applies to new solicitations issued on or after August 13, 2019 and any resulting contracts, as well as to contracts that are awarded on or after August 13, 2019 even if the solicitations preceded that date.

<u>FAR Case 2018-017</u> addresses the provision of covered telecommunications equipment or services by:

- Prohibiting contractors from providing covered telecommunications equipment or services unless the agency confirms that an exception applies, or a waiver is granted.
- Requiring every offer for a contract or order that includes covered equipment or services to provide additional details.
- Mandating that contractors report any covered equipment or services if discovered during the course of contract performance.

This prohibition applies to <u>all</u> contracts, including those below the Simplified Acquisition Threshold and purchases below the Micro-Purchase Threshold.

For additional clarification, please reference the <u>889 FAQ for Acquisition</u> Workforce or the <u>FAR 4.2105 Decision Tree</u> found on the Simplified Acquisition SharePoint site.

## HHS POLICY FLASH 20-01: ACCURATE PRODUCT SERVICE CODE (PSC) SELECTION IS CRUCIAL

The HHS acquisition workforce is reminded the selection of the most accurate, precise, and descriptive Product Service Code (PSC), based on the predominant product or service being purchased, is critical to the federal reporting process. The purpose of the codes is to indicate "WHAT" and "HOW" specific products and services are being purchased and to assist industry, agencies, and government leadership with making critical procurement policy and acquisition decisions. The information collected provides data for compiling legally mandated reports, examine existing trends in Federal spending, and helps link procurement systems to contracting and financial data.

Miscellaneous PSC codes ending in "99" [e.g., R499 (Support – Professional: Other), R699 (Support – Administrative: Other), and R799 (Support – Management: Other)] are often selected as the default codes rather than the exception. To support data integrity and prudent business decisions, acquisition

## HHS POLICY FLASH 20-01: ACCURATE PRODUCT SERVICE CODE (PSC) SELECTION IS CRUCIAL

Continued from page 1

professionals are encouraged to use miscellaneous codes sparingly since they are vague and do not supply adequate information on purchase types and categories. Contracting officers are encouraged to choose a PSC code that is meaningful and best describes what is truly being bought.

In addition to recording accurate PSC codes, acquisition professionals are reminded to use the "Description of the Requirement" field in FPDS to fully summarize the principal purpose of the order in as much detail as possible.

#### Additional Resources:

The <u>Federal Procurement Data System Product and Service Codes Manual</u> (June 2019 Edition – effective June 28, 2019)

The Defense Pricing and Contracting (DPC) office maintains a Product Service Code (PSC) Selection Tool to assist the acquisition workforce with selecting Product Service Codes, Object Classification Codes, and North American Industry Classification System (NAICS) codes. <u>PSC Selection Tool</u>.

## CLEAR CONTRACT LANGUAGE CRUCIAL TO CONTRACTOR PERFORMANCE

he Nuclear Regulatory Commission (NRC) Office of the Inspector General (OIG) conducted an evaluation of contracts focused on Voice over Internet Protocol (VoIP) deployment. The evaluation found the language used in a series of contracts was unclear and too board.

In one case, the ambiguous language found in the contracts led to confusion as to whether the contractor (Verizon) was responsible for physically installing the VoIP phone on the desks at headquarters. While NRC believed Verizon to be responsible, Verizon disagreed and ultimately did not install the VoIP phones. As a result, NRC had to incur additional cost by issuing another contract to perform the work.

NRC contacted GSA for mediation because the agency believed that Verizon was not fulfilling its contractual duties. However, after GSA reviewed the language in the contract, it was determined that Verizon was performing the work stated in the Statement of Work, as written. As a result, NRC could not recover any costs. The result was programmatic

confusion, delay in work, and added cost to meet program objectives.

The reason this occurred is because the contract language was unclear and too broad.

A contract must clearly define the work for which a contractor is responsible as well as the performance objectives that must be met.

To avoid situations like this, OIG recommends: clarification on contractor roles and responsibilities, consultation of legal counsel to avoid gaps and duplication of services, establishment of policy for all new telecommunications contracts & future modifications to current telecommunications contracts, and finally, that CORs review roles and responsibilities to prevent gaps and duplication of services.

Contractual language is essential to the success of the program and contractor performance. Poorly written line items and Statement of Works (SoW) will only lead to greater burden in the future. Please visit <a href="Evaluation of NRC's">Evaluation of NRC's</a> <a href="Oversight of the Voice over Internet Protocol Contract and Implementation">Implementation</a> to review the full OIG evaluation.

#### WHITE HOUSE HONORS NIH HBCU PROGRAM

he National Institutes of Health (NIH) and Historically Black Colleges and Universities (HBCUs) have shared a long history of successful advancements in healthcare. HBCUs maintain a longstanding tradition of contributing to the nation's public health—as well as diversifying the healthcare profession.

In 2017, Ms. Diane J. Frasier, the NIH Head of the Contracting Activity, Director, Office of Acquisition and Logistics Management (OALM) established the Path to Excellence and Innovation (PEI) Program in accordance with the Presidential Executive Order (EO) 13779 *The White House Initiative to Promote Excellence and Innovation at Historically Black Colleges and Universities (WHIHBCU)*. The PEI's mission is to empower HBCUs with the knowledge, resources, and skills they need to effectively and consistently compete for and win partnership opportunities within the NIH.

On September 9, 2019, the PEI program received the Chairman's Award from the White House Initiative on HBCUs at the 2019 National HBCU Week Conference. The award recognized the NIH's efforts to strengthen HBCUs ability to equitably participate in federal programs, explore new ways to improve the relationship between the federal government and HBCUs and establish how each respective agency intends to increase the capacity of HBCUs to compete effectively for grants, contracts, and cooperative agreements. Notably, the WHIHBCU acknowledged the NIH's implementation of the first NIH HBCU Industry Day on March 12, 2019. The event brought HBCUs, industry, and the NIH acquisition, grant, and program officials together to collaborate on best practices and form partnerships. Currently, there are six HBCU's in our pilot program – Jackson State University, Howard University, Hampton University, Meharry School of Medicine, Morehouse School of Medicine, University of the Virgin Islands.

Moreover, former HHS Secretary Dr. Louis Wade Sullivan accepted the Lifetime Achievement Award for his leadership in minority health research and policy. The NIH Deputy Director, Lawrence A. Tabak, D.D.S., Ph.D., and Dr. Eliseo J. Perez-Stable, M.D., were in attendance to support these awards.

If your institute or center has programs about the infrastructure and/or training of HBCU administrators, please email NIHSmallBusiness@nih.gov.
