Akira Technologies, Inc., delivering sophisticated, customized solutions that improve business efficiency across the enterprise, since 2003. Akira is an agile provider of technical solutions that enable mission-critical operations and decision-making. Our solutions help our customers improve their business performance through information technology transformation services focusing on architecture, information management, systems integration, and integrated solutions. Akira is SBA certified HUBZone Small Business.

What We Do:

Software Development and System Integration

Cloud Consulting
Cloud Strategy Development, Cloud Architecture (Public/Private/ Hybrid), Cloud Migration Planning & Execution, Cloud Software and Services Integration, Cloud Readiness Assessment, Cloud Service Management & Governance, Managed Services

Cybersecurity

Data and Analytics
Big Data, Cloud Hosted Data Analytics, Data Science & AI, Enterprise Data Management, Modern BI/DW

Enterprise Services
Network Engineering, Identify and Access Management, Software Defined Networking (SDN), Network Administration

ISO 9001:2008

AKIRA LABS – Akira Labs works to research, develop, and integrate cutting edge technologies and solutions.

- Cloud Management Platform (CMP): unifying multi cloud (public/private) environments with a centralized hybrid cloud dashboard
- Fully Automated Solutions: Fully Automated DevOps solutions. Continuous Integration and Continuous Delivery. Deployment Metrics

Big Data Solutions - Analyze structured and unstructured data, with distributed processing big data frameworks to create both operational enhancements and strategic impacts. We build and operate Big Data solutions using open-source Apache Spark and Apache Hadoop; commercial big data stacks from Databricks, Cloudera, Hortonworks, and SAP; and cloud-hosted big data services from Azure HDInsight, AWS Elastic Map Reduce, and Google Dataproc. Our solutions use lambda architectures to ingest both streaming and batch data for real-time insights.

Cloud Computing - Akira has a dedicated Cloud Computing lab. Our comprehensive offering assists our customers through the full lifecycle of cloud computing—from strategy and planning to design, delivery, and managing of cloud environments. We have designed, implemented, and managed several cloud environments for early adopters and formed strategic industry partnerships with such global leaders in cloud computing as VMware, Amazon, Microsoft, EMC, Cisco, Citrix, and many others.

Akira Technologies Cloud Offerings include; • Cloud Strategy Development • Cloud Readiness Assessment • Cloud Architecture (Public/Private/Hybrid) • Cloud Migration Planning and Execution • Cloud Software & Services Integration • Cloud Service Management & Governance • Cloud Security Management

Cybersecurity - Government faces a myriad of security challenges, and the industry offers so many tools to address insider threat, mobile/endpoint protection, malicious external attacks of varying types. Akira Technologies offers a portfolio of best of breed products coupled with expertly trained personnel to both understand the organization’s challenges and build solutions to protect its data and assets. Akira currently provides Cybersecurity, Identity Access Management and Information System Security Management in support of Defense and Civilian federal government customers.

Identity and Access Management (IAM) Services - It’s no secret that Identity & Access Management is one of the most complex Enterprise Initiatives an organization can undertake. Not only is it pervasive in the sense that it impacts every user in the organization, but challenges presented by cloud adoption, remote workforces, BYOD and mobile device demands, growing compliance requirements and complexity, and an ever-growing threat landscape. We have designed and implemented Identity and Access Management (IAM) solutions as a Service. Our IAM offerings include: • Identity Management As a Service (IDaaS) • Identity Governance As a Service (IGaaS) • Identity Intelligence & Analytics • Privileged Account Management

Value Added Reseller (VAR) – more than 500 OEMs. Our VAR team has relationships with COTS providers. We know the equipment inside and out.

Automated Resource Management Associates (ARMA) Inc. is a trusted, woman-owned small business (WOSB), certified through the Women’s Business Enterprise National Council (WBENC) and is SBA HUBZone certified. We offer significant background and experience in providing research, technical assistance, and data management services to Federal, State and private clients, with a commitment to applying best industry standards and solutions that are driven by technology and informed by scientific evidence. Our data analysis and data management competences expand beyond systems and programmatic analytics as is evidenced by our 30 years of experience in delivering value-added enterprise-wide solutions to our clients. With a knowledgeable and experienced team of experts in research, technology, and data management, ARMA brings strategic solutions for navigating key decisions in important subject areas, together with an understanding of the nuances of service and product implementation in various business contexts.

Our commitment to high quality service and deliverables serves as a guide to our data management solutions and plans, and we offer clients knowledge and techniques, including innovative, time-tested approaches for processing voluminous and disorganized data (big data) into meaningful, actionable strategies that advance decision-making. ARMA’s competencies and reliability in supplying subject matter experts (SMEs) with significant expertise in data management, IT, and research has made us an instrumental source for hiring and supplying high caliber personnel to help organizations maximize productivity and surpass expectations in next-generation programming.

Department of Veterans Affairs (VA)

James A. Lovell Federal Health Care Center (JALFHCC) Guest Internet Access (GIA)
• Planned, surveyed, deployed, and managed a turnkey wireless guest internet access solution at JALFHCC.
• Developed the guest internet landing page, monitor performance, and manage web content filtering.

Laboratory Systems Re-engineering Project (LSRP) Product Support
• Upgraded VA’s Huntington, West Virginia, ‘Alpha Site’s’ laboratory system from VistA Applications to Cerner Millennium PathNet Laboratory Information Management System (LIMS).
• Provided implementation, disaster recovery support, technical support, system security, network connectivity, application support requirements, testing, O&M, code review and fixes, licensing, and transition support.

Enterprise Program Management Office (EPMO) Benefits Appeals and Memorial Program Management Office and Technical Management Support Services (BAM PMO)
• Provide program and project management support for various VA OI&T projects within the BAM Portfolio.
• Provide administrative support, meeting support, capital planning and investment, communications, technical writing, configuration management, onboarding, requirements elaboration, functional analysis, implementation management, release management, schedule support, strategic analysis, engineering and technical support.

Community Care Reimbursement System (CCRS) Development
• Provide project management, requirements analysis, design, development, COTS integration, testing release support, warranty, and documentation for requirements supporting the CCRS program.

Enterprise Reporting and Analytical Support (ERAS)
• Support VHA’s critical Care in the Community / Revenue Operations (CC/RO), which manages Veteran registration, eligibility, determination, enrollment, medical information management and a broad range of revenue and recovery activities specific to billing and collections.
• Provide operations and maintenance for CC/RO Reporting Systems and Data Warehouse to support performance metrics monitoring and reporting.

Employee Education System (EES)
• Design and implement a custom dashboard for VHA’s Employee Education System (EES).
• Identify, transform, and cleanse data from disparate legacy sources into a central repository increasing overall system performance.

Veterans Benefits Administration (VBA) File Bank Extraction
• Perform file bank extraction services in support of file room reduction/closure at VA Regional Offices and facilities.

Defense Intelligence Agency (DIA)

Analytic Development Office (ADO), Knowledge Management Division (ADO-5)
• Provide technical analysis and engineering assistance with program, requirements, release management, and IT related multi-source task responses of the IT capabilities that support the entire range of the DI ADO-5 missions and tasks.
• Assist in IT planning, program management and deployment support, requirements management services and support, portfolio management, and process improvement.

Architecture and Information Technology (A&IT)
• Provide Architecture and Information Technology (A&IT) support to plan and coordinate, current and future Enterprise Architecture and IT needs among many customer sets in a joint operational environment that supports the mission of the Combatant Command (CCMD) and the Intelligence Enterprise (IE), with emphasis on the CCMD Joint Intelligence Operations Center (JIOC).
• Define the Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) Enterprise Architecture required to support the CCMD Theater Campaign Plans and Family of Plans, identify the deficiencies in intelligence processes and systems, and recommend solutions or mitigation in keeping with the Department of Defense Architecture Framework (DoDAF).

CompQsoft, Inc. (CQS) is a HUBZone small business based out of Houston, TX with an office at Leesburg, VA, with more than 20 years of experience in IT and communications systems deployment, sustainment, and O&M. CompQsoft offers the full range of Information Management (IM) services including program and project management; data cleansing, migration and fusion; business intelligence, analytic applications and solutions; software development, integration and support; operations and maintenance (O&M); independent test, validation, verification and evaluation; management support services; training, communications and outreach support services; engineering design development and implementation services; service desk support; and mobile device and mobile application management solutions. The best planned programs are those built on the best practices and standards of their industry. CompQsoft has expertise and, where appropriate, certifications in ISO and the SEI CMMI. These are best of breed standards for guiding the planning and execution of a quality program. CompQsoft is an ISO 9001:2015, ISO 20000-1:2011 & ISO 27001:2013 as well as CMMI Level 3 Certified (for both Services and Development) company; CompQsoft is also a certified SAP services partner, Certified IBM Business Partner with a global infrastructure that enables us to deliver cost effective and innovative solutions.

Core Capabilities:

- SAP and Oracle Peoplesoft implementations, O&M
- Data Cleansing/Migration
- IT Infrastructure Integration and Support
- Cyber Security
- Cloud Migration Services (AZURE, AWS, Google Cloud)
- Software Design & Development
- Independent Test & Evaluation
- Training Development and Delivery

Functional Expertise:

- DOD Supply Chain Management
- Warehouse & Distribution Management
- DOD Financial/Funds Management
- Pay and Personnel
**EXPERIENCE**

**CDC – Centers for Disease Control and Prevention MASO:**
Supported CDC in planning, design, development, testing and deploying of the Policy Management application on Development, Stage and Production environments, in accordance with Information Assurance guidelines, 508 compliance, industry best-practices and Information Technology requirements. Developed complex web-based software applications involving new technologies, methods, concepts, or approaches. Developed diagrammatic plans and design logic to implement computer programs; IT systems and procedures in support of technical, administrative and information management functions and operations; Automated the Policy approval workflow; developed a user interface to integrate the workflow; Improved user interface and application performance.

**Social Security Administration (SSA)**

**ITSSC2:** Provide Agile team support to include: Agile Coaching, project management/scrum master, automated testing; business operations, analysis and reporting, DataCenter IT hardware, Desktop Support, mainframe developer, and development front, middle and backend teams.

**Department of State** – subcontractor to SAIC supporting IT and Telecom – other IT and Telecommunications working within the Vanguard 2.2.1 program Enterprise Security Office (ESO), supporting assessment and authorization (A&A) of major applications and the Information Assurance (IA) office to include SCA findings.

**Internal Revenue Service (IRS) sub to IBM:** supports the Return Review Program, a unified system integrated into IRS’s modernized infrastructure for detection of fraudulent returns and refund fraud schemes.

**US ARMY General Fund Enterprise System:**

**GFES:** ERP solution built on SAP, (COTS) system. One of the largest SAP implementations with over 80000 users at 200 locations worldwide. Provide software development life cycle. Supported GRC (Governance, Risk and compliance) practices, project systems, Plant maintenance, Material Management, Spending Chain, Sales & Distribution, Financials, Equipment &Assets and integrating/deploying the same with other DoD systems. Develop training materials, metadata standards; and report training material metrics.

**TEWLS:** is an information technology system within the Defense Medical Logistics – Enterprise Solution (DML-ES) portfolio. The DML-ESportfolio provides a continuum of medical logistics support for the Defense Health Agency. TEWLS consolidates numerous military logistics functions into a single application and database. Provide complete software development life cycle in implementing this system. Consolidated multiple medical logistics functions into a single portal System supports Warehousing of medical material, Material distribution and transportation, Creation and management of medical assemblies Instantaneous data-sharing among Department of Defense logisticians worldwide.

**Joint Interoperability Test Command (JITC) Mission Support Services (JMSS):** Prime contractor providing support to mission systems, including cybersecurity service, cyber incident response, and vulnerability management of 40 servers and 400 users’ endpoints on Unclassified but Sensitive Internet Protocol Router (NIPR) and Secret Internet Protocol Router (SIPR). We develop and manage several JITC mission applications, including performing vulnerability testing of web-based applications. We maintain the JITC SharePoint Portal.

**NAVY Integrated Personnel and Pay System** (IPPS-N) Support the Navy's BPR efforts, identifying functional requirements incrementally, perform analysis across personnel systems using formal, standardized processes and procedures to determine the best Course of Action (COA) to satisfy the requirements. We support utilization of benchmarking methodologies to assist the Government in requirements analysis against industry standard consists of a concise problem/requirement statement, gathering of process data and making assumptions relevant to the requirements, analyzing business process re-engineering results and performing additional lower level business process engine if necessary. We identify potential COAs, development, and application of evaluation criteria and selection of the most viable COA for the requirement and integrating several supporting analyses, such as Function Point (FP) and/or cost-benefit analyses. We support requirements analysis activities in support of systems consolidation planning and preparation and Fit/Gap activities to validate and map RHS requirements to Oracle PeopleSoft HCM v.9.2 Client: Texas Department of Family & Protective Services Network Supported this web based application project by providing application and system testing services and reporting.

**We analyzed system requirements, performed application testing to ensure all programs developed by the agency met the design specifications and standards prior to release by identifying the test case functionality be automated and enhance the test scripts to perform functional and system integration tests on the deliverables.**

**Client: North Carolina DHHS**

**Project: ACTS (Automatic collection tracking system) for Child Support Enforcement** Supported the development and integration of the ACTS system, based on CICS transaction process, to the child support and intranet e-commerce portals by developing the programs as per client requirements in TELON environment. The program development was done primarily on COBOL, DB2 with the integration and enhancements provided on WebSphere.

**Client: Public Health services (PHS) Migration and maintenance of PHALCON System:** Upgrade and migration of Oracle front-end application and PowerBuilder back-end database. We assisted PHS to migrate Oracle 7.3 to v9.0 and PowerBuilder 7.0 to v9.0, developed enhancements to the system, used for patient management and services, as per user requirements. The technology was client-server architecture on Windows OS involving object-oriented design, PFC, stored procedures.

**NGEN (NAVY):** The Next Generation Enterprise Network (NGEN) represents the continuous evolution of the Department of the Navy’s (DON) enterprise networks and provide secure, net centric data and services to the Navy and Marine Corps personnel. Cyber security, Net Ops specialist, Enterprise Service Desk Services in various CONUS & OCONUS locations.

**DISA Joint Services Provider’s Audio Visual and Video Teleconferencing:** Provide procurement and installation support, asset and inventory management, software development, sustainment, help desk, operations, systems engineering, enterprise architecture, and program management support for the Audio Visual and Video Teleconferencing (VTC) capabilities at the Pentagon and the Marc Center Alexandria. JSP’s managed IT and enterprise systems supports over 42,590 users at Supported Agencies (including 28 Presidential Appointees needing Senate confirmation (PAS), hundreds of Senior Executive Service (SES) leaders, and Flag and General Officers. Provide unique requirements across four primary networks, in support of ~ 75,000 assets at 97 locations, comprised of 98 mission-specific applications.
Do business with NITAAC and you'll learn one thing quickly – the customer always comes first. We've geared our operations around your needs. Whether you're just beginning a solicitation and need help with research, or you've already placed a task or delivery order on one of our vehicles, NITAAC is committed to making sure you get answers faster, so you can keep your acquisition on track.

**Value**

Agencies can use this Best-In-Class contract to make smart buying decisions that eliminate redundancies, increase efficiencies, and deliver more value and savings.

**Quality**

Best-In-Class contracts are designated by OMB after meeting the most rigorous performance standards, making CIO-SP3 Historically Underutilized Business Zones (HUBZone) track a key acquisition tool. FAR guidance is built into the system, which can be used to manage every phase of the procurement process.

**Order Contract#: HHSN316201800045W**

For more detailed guidance, please contact the Customer Support Center 1-888-773-6542 or email NITAACsupport@nih.gov. NITAAC’s secure, web-based electronic government ordering system (e-GOS) for competition management and awardee selection assists with streamlining the procurement process.

Delmock Technologies, Inc. (DTI)
GSA IT 70 Schedule GS35F0398R
8(a) JV HUBZone: RELI-DTI LLC
## DTI’s Representative Experience and Benefits

### Program Management
**Benefit:** Proven history (CPARs rated EXCEPTIONAL) of collaborating with stakeholders to develop trusted partnerships through performance based contracting and Integrated Project Teams. *DTI implemented Integrated Company Teams using metrics (SLAs, KPIs) to lower client costs by 20% on O&M and Agile projects.*

### Application Development & Maintenance
**Benefit:** Expertise includes development, test, integration, implementation of custom developed infrastructure application & interfaces (e.g., SiteMinder, CA Directory (eTrust), WebSphere, JAVA, Oracle, Business Objects, SAP, and MQ Series); COTS software, 24x7x365 Help Desk spanning diverse geographic locations throughout United States. DTI provided quick reaction authority and highly responsive technical teams to meet (exceed) mission needs and priorities. *Robust technical expertise resulting in 99.5% rating in level 1/2/3 trouble ticket support.*

### Data Management
**Benefit:** Develop, implement, integrate, operate and maintain analytical applications using BI solutions and associated techniques for Enterprise Data Warehouse; Products: Amazon Redshift, IBM Netezza, SAP Business Warehouse, Relational Junction, GreenPlum. *Successfully collected all metrics and project data through ETL.*

### Health & Information Technology
**Benefit:** Expertise in health IT infrastructure that ensured systems availability and reliability for ACA applications across the United States, resulting in recognition by IRS Chief Technology Officer (CTO), for excellence. DTI SMEs have demonstrated excellence in the implementation and integration of quality solutions that support IT, healthcare and financial systems nationwide, including initiatives like the National Data Centers Consolidation. *Performed healthcare IT research/studies/analysis and provided operational, technical, and maintenance services for systems, subsystems, networks and equipment which interface with information systems throughout the Federal Government including HHS, CMS, State agencies, as well as, a wide array of Pharmaceutical outfits.*

### Enterprise Security Solutions
**Benefit:** Security transition and continued operations; maintained labs, protected digital assets for millions of users; implemented rigorous standards and procedures (HIPAA, PII, FITSMA, NIST, NIACAP) required for specified mission/business IT-enabled capabilities including software embedded in hardware devices. *Security solutions which have countered technological threats: managing risks, prioritizing threats, and preventing cyber crime.*

### System Engineer Integration/Engineering & Scientific
**Benefit:** 12+ years of experience supporting major modernization efforts: software engineering and integration for middleware infrastructure and various enterprise business applications along with client-servers, web-based and virtual cloud computing architectures providing a Forward Looking Approach which transformed, modernized, and continuously improved service delivery and clients’ satisfaction. *Certifications: CMMI-DEV/SVC L-3, ISO, ITIL, etc.*

### Business Process
**Benefit:** Implemented tailored SDLC, Agile & ITIL frameworks, which used incremental risk based approaches for different types of IT programs and projects. *Our approach is anchored in communication, collaboration and improved transparency which allowed the SMEs to create various IT Service Catalogs (ITSM based).*

### Workforce Knowledge & Empowerment Service
**Benefit:** SMEs who served as thought leaders bridging the gap between the current “As-Is” and future “To-Be” state of applications, databases, operations and maintenance services. *Reach back to Industry's Thought Leaders -- DTI has formed Technology Innovation Councils with its partners to ensure that stakeholders have cutting-edge solutions for their current and emerging IT challenges. Morgan State University’s partnership consist of interdisciplinary informatics (i.e. education, research, and clinical), training, visual analytics, and smartphone app development.*

### Sample Prime Contracts

### Sample Clients
U.S. Departments: Health & Human Services, Treasury, Education, and Commerce; Washington Suburban Sanitary Commission (WSSC); IBM; and Northrop Grumman.

Corporate Summary
For 26 years, Fairfield Technologies (FTI), an Agile CMMI Level 3 company, has delivered leading-edge information technology (IT) and mission support for Federal agencies in two focused areas:

- **National Security** – Defense, Intelligence, Homeland Security, and Law Enforcement
- **Scientific Missions** – Weather, Space, Environment, Energy, and Healthcare.

Selected FTI Experience
1. **IT Infrastructure Modernization (DHS) (Fairfield Prime)** – Agile, Exchange architecture, mobility, messaging, Active Directory, SAN, virtualization, cybersecurity.
2. **U.S. Army Medical Information Technology Center (USAMITC) (Fairfield Prime)** - Data exchange, software O&M, web application engineering, testing, security, deployment for MTFs worldwide.
3. **FBI Intel/Law Enforcement Systems (Sotera Prime)** - Data warehouse development, COTS, O&M (geospatial data, Linux sys admin, Oracle DBA, J2EE, “Big Data”, testing, case management)
5. **National Weather Service (Raytheon Prime)** – Lifecycle Agile software development, testing, integration, modernization, migration, CM, 24/7/365 network operations, ITSM service desk, system administration, IA, J2EE.

Selected FTI IDIQs, Subcontracts
- **Navy – Seaport-e (Fairfield Prime)**
- **Army – CECOM NexGen (Bowhead)**
- **Air Force – NETCENTS-2 (RTN Prime), CAAS IV (CACI Prime)**
- **FBI – ITSSS (Sotera Prime)**
- **National Geospatial-Intelligence Agency – ESMARTS (Booz Prime)**
- **Successfully-Completed Mentor-Protégé Agreements – NASA (Raytheon), U.S. Treasury (DRC)**

Business Awards, Certifications
- **HUBZone Corporate Citizen of the Year (2016)** – HUBZone Contractors’ National Council
- **DHS Small Business Achievement Award (USSS-2015)**
- **INC. 5000 List of Fastest Growing Companies (2013)**
- **Agile CMMI Level 3, Company-Wide**
- **ITIL, ISO 9001/20000-compliant**
- **PMP, ACP, CISSP, MCSE, RHCE**

Socio-Economic Certifications
- **SBA-Certified HUBZone Firm**
- **SWAM-certified, Department of Minority Business Enterprise, Commonwealth of Virginia**
FTI Strategic Support:
- Transition and Integration
- Achieving Strategic Outcomes
- Personnel Management

FTI Capabilities & Experience:
- Enterprise Activities and Services
- Customer, Work Center Support
- Mission/Business Applications, Tools, Portals, and Web Services
- Enterprise Computing, Storage, Shared And Field Services
- Network and Communications
- Cybersecurity/Info Assurance
- Special Services (including Surge Support)

Agile Lifecycle IT and Modernization Services
- Agile Software Design, Development, Deployment
- Software Testing/Automation, Quality Assurance, IV&V
- Release, Configuration, Operations Management
- Systems Administration, Documentation, Training
- Network Ops, Management, Security, Info. Assurance
- Virtualization, Cloud Migration, IaaS, PaaS, SaaS
- 24/7/365 ServiceDesk, Management, Improvement

Process and Performance Improvement
- Agile, Scrum, Scrum of Scrums, Scaled Agile Framework (SAFe), Extreme Programming, DevOps
- Business Process Re-Engineering (BPR)
- Lean Six Sigma, Continuous Improvement
- Capability Maturity Model-Integrated (CMMI)
- IT Infrastructure Library (ITIL), ITSM, ISO 9001/20000
- Rapid Prototyping, RAD, JAD, Facilitation
- PMP, CISSP, CCNA, MCSE, Java, RHEL, VCP, Agile Certs

Key Technical Capabilities
- Feasibility Studies, Risk Assessment, FISMA
- Program/ Acquisition Management and Support
- Enterprise Data Architecture, Modeling, Analytics, Warehousing, Mining, Visualization (“Big Data”)
- MS-Exchange/ Messaging Architecture, BlackBerry, Mobility, Management Support
- Intelligence, Law Enforcement, GEOINT, OSINT, SIGNIT, Analyst Notebook, Geospatial Applications
- Healthcare, Financial Applications
- Knowledge Management, Intranets, Portals
- Web Design, Web 2.0, SEO, J2EE, Net, SOA

Exceptional Performance For Defense, Intelligence, and Civilian Customers:
- Technical, Mission Performance
- Cost, Schedule & Quality Control
- Contract and Customer Relationship Management

Strong Pipeline in All LCATs
- Program, Project, and Configuration Management
- HW, SW, Network Engineering
- SW Development, Testing, QA
- Systems, Database, and Storage Administration
- Service Desk Support, IT/Data

Why Fairfield?
- Demonstrated performance in defense, security, and intelligence
- Solid, cleared recruiting pipeline
- Able to deliver outstanding professional staff at a competitive price

FEFA brings a stable history of established processes, proven capabilities, and corporate resources coupled with highly relevant experience in biotechnology, U.S. and international regulatory guidelines, research and development support, veterinary care and animal husbandry, and clinical research support. FEFA is an SBA Certified HUBZone firm that is also ISO 9001:2015 Certified. We have an established process for meeting and exceeding client expectations.

**Regulatory Compliance**
Providing support to ensure compliance with national and international regulations and guidelines from the FDA, OHRP, ICH-GCP EMA, as well as state and local policies.

**Clinical Research**
Research coordination and participant care services are offered for a variety of studies. Qualified staff with years of experience conducting projects scientifically, ethically and reliably.

**Animal Research**
Animal husbandry services performed 7 days per week, 365 days per year. Also providing animal health monitoring, surgical assistance, veterinary care, and facility management.

**Laboratory Equipment**
A distributor of high-quality laboratory equipment for the scientific community. We work closely with manufacturers to guarantee the successful performance of products for scientific research in broad areas.

**Additional Services:**
- **Scientific Matter Experts**
  - Scientific and Technical Experts
  - Regulatory Affairs
  - Statisticians
  - Biostatisticians
  - Clinical Research Analysis and Review
  - Data Management
  - Scientific and Technical Writing
  - Site Visit Observation Reports

- **General Services**
  - Database Administration
  - Interactive Media and Multimedia
  - Records Management
  - Organizational Development
  - Standard Operating Procedures
  - Strategic Planning
  - Strategic Sourcing Analysis
  - Technical Assistance and Development
  - Work Process Analysis

**Additional Service Areas**
- **Staffing Support**
- **Scientific Equipment Maintenance and Service**
- Pharmocovigilance & Clinical Safety
- **Statistical Analysis & SAS Programming**
- Quality Assurance
- Subject Recruitment
- General Scientific and Research Support
- Communications Services

**Subject Matter Experts**
- Scientific and Technical Experts

Our past experiences of delivering quality solutions have included clients in both the commercial and federal sectors. The most visible and meaningful measure of customer satisfaction are positive feedback and a willingness to renew contracts year after year with FEFA.

Key Clients include a Diverse portfolio of Federal Customers:
- U.S. Environmental Protection Agency
- The National Institutes of Health (NIH)
- Department of Defense (DoD)
- U.S. Food and Drug Administration
- Multiple Corporate Partners

Division of Cancer Research and Training
Design to include an administrative, research, planning and evaluation, and developmental core, all of which encompass programs that focus on the biology, etiology, prevention, detection, diagnosis and/or treatment of human malignancies.

HIV/AIDS
Providing both International, National and Community HIV/AIDS research. Our researchers fight the HIV/AIDS epidemic by studying the behavioral and clinical aspects of HIV/AIDS prevention and treatment. Our leadership and commitment to research have substantially advanced the understanding of and fight against the HIV/AIDS epidemic in underserved communities. Our international research has included areas such as Angola, Rwanda, Belize and Jamaica.

Clinical Translational Research Center
FEFA has access to a facility that is located in 5,000 sq. ft. outpatient and administrative unit with seven exam/treatment rooms, a processing laboratory and a dedicated consultation space for study participant interviews. We provide cardiovascular and metabolic assessment resources, a site dedicated pharmacist, negotiated lab fees for assays, and participant transportation. The Center offers additional conference room spaces and houses both Morphometry and Core Laboratories. Our clinical staff is knowledgeable and skilled in protocol implementation, data collection, phlebotomy, IV insertions, pharmacokinetic studies, administration of investigational drugs, multiple sample collection, Oral Glucose Tolerance Tests, glucose clamp studies, EKGs, and assisting investigators with minor bedside procedures. Pharmacy services include procurement, disposal, packaging, randomization and dispensing. Currently the center services seven actively recruiting studies in the areas of HIV/AIDS, Cancer, Social/Behavioral and Cardio-metabolic Research.

Animal Husbandry and Veterinary Support
FEFA employees perform tasks that include animal husbandry services on a seven days per week, 365 days per year basis. We also provide animal health monitoring, surgical assistance, veterinary care, and facility management. In the following subsections, we document our broad experience and expertise in providing animal husbandry, facility management, technical support, surgical support, veterinary care and health surveillance, transportation, and logistics and inventory management support services.

Biomedical Informatics
This core facility provides support in informatics applications in the areas of image transmission and display, video teleconferencing, and multimedia databases between participating institutions, using a high-speed network infrastructure and paved the way for joining "Internet 2". Information technology (IT) infrastructure is also useful acquiring, indexing, archiving, and extracting content (e.g., data mining) from large volumes of data.

Translational Science Research
Our team science activities are supported by eleven core functions: Biomedical Informatics; Community Engagement; Clinical and Translational Research Center; Research Design and Biostatistics; Evaluation; Innovations and Partnerships; Pilot Program; Regulatory; Research Education and Training; and two Technical Core Laboratories.

Elimination of Cancer Health Disparities
Numerous research projects are currently being conducted by the staff, including basic laboratory research, community outreach and engagement and clinical trials activities.

Site Management and Monitoring
Geographically dispersed, experienced clinical research associates are well-versed in design, implementation and collection, and their analysis methods provide in house support to clinical sites for all study activities including initiating sites, performing interim and closeout monitoring, and ensuring regulatory compliance.

Laboratory and Scientific Equipment
FEFA serves as a distributor of high-quality laboratory equipment for the scientific community. We work closely with manufacturers to guarantee the successful performance of products for scientific research in broad areas. FEFA strives to provide innovative, cost effective products, and support to ensure complete satisfaction for our customers.

Inoventures Success Stories

Cloud Solutions

U.S. Department of Commerce
US Census Bureau

Inoventures is partnered with the Census Bureau through 2023 to develop software, assist with cloud migration, operations testing and control. At the Census Bureau, Inoventures employs state-of-the-art database and geospatial analyses to support the Bureau’s 2020 Census initiatives. Our data analysts work on boundaries for legal and statistical entities and we are helping the Bureau in transitioning applications to the Oracle cloud environment.

Systems & Software Engineering

U.S. Environmental Protection Agency
Office of Research and Development

Inoventures provides software engineering support to the Office of Research and Development. The software engineering specialized scientific support services team provides flexible, innovative, and cost effective information technology solutions to the EPA and partner user communities, Federal and State agencies. Tasking includes modeling, software development, visualization, statistical correlation analysis, science and research support.

Application Development

National Institute of Environmental Health Sciences
National Toxicology Program (NTP)

Inoventures is responsible for redesigning UI, defining user experience, mapping information architecture and user interactions. Inoventures team works closely with Information Technology Resources Advisory Committee ITRAC while designing interfaces for mobile and desktop web applications.

Hughes Network Open View Monitoring

Implement complex policies for monitoring many HP servers, network devices and Hughes applications in a highly technical environment. Inoventures’ scope includes upgrading and patching of all HP Open View OMU/OML, enhancements of the Hughes servers, accurate systems engineering, management of alert messages and avoidance.

Strategy & Management Consulting

U.S. Environmental Protection Agency
Office of Water

Our team Designs and develops in/out-of-band data exchanges between the primary Agency and Federal systems via web services. We provide Infrastructure Branch Support including the Compliance Monitoring Data Portal (CMDP), SDWIS Prime, Data Migration, and SDWIS APIs.

Information Security

Federal Deposit Insurance Corporation (FDIC)

At FDIC, we provide requirements analysis, life-cycle analysis, information technology security support and database management. We assist in various aspects of applications monitoring and security management for over 40 applications. Our support includes tasks from computer security, trouble shooting to help desk management with mobile apps, ADP and Wolf systems.

Information Security

Financial Industry Regulatory Authority (FINRA)

Inoventures’ team develops trading information for FINRA’s Blue Sheet data files. These files provide daily trading/account information to SEC with intricate analyses of every US financial firm’s trading transactions on a daily basis. We use Premise Oracle, Big Data, Postgres SQL on AWS Cloud, Angular JS, Java Messaging Service on SQS, SNS on AWS Cloud.

Inoventures' scope includes upgrading and patching of all HP Open View OMU/OML, enhancements of the Hughes servers, accurate systems engineering, management of alert messages and avoidance.

Infrastructure Support

Verizon Business Analytics

Developed sophisticated CHAID segmentation models for the Verizon VISA group and helped them earn $325M in portfolio assets by targeting right customers. Performed numerous data analysis and profiling models using SPSS and SAS programs for Verizon wireless and long-distance programs and established best-cost and innovative algorithms that continue to increase revenues for Verizon.
MPF Federal Government Services

MPF Federal offers cost effective and innovative solutions that leverage decades of extensive experience by a team of professionals. These professionals are experienced in supporting requirements at government facilities and have an extensive and highly successful history of performing support for satisfied customers across the country.

Professional and Management Support
MPF Federal is committed to providing a full spectrum of professional services. MPF’s approach results in cost-effective solutions which are of strategic value to our customers and provides a rewarding work environment for our greatest assets, our employees. MPF recruits specialized talent with a full range of expertise.

MPF maintains the ability to recruit and deliver professionals with the security clearances across a wide variety of professions, saving you significant time and recruiting costs. We offer Direct Placement, Contract-to-Hire, Program Management, Project and Surge Staffing Solutions.

Value-Added Capabilities
- Project Management Office (PMO). MPF is dedicated to servicing complex Federal Government programs.
- Technical and Professional Personnel. MPF provides professionals in nearly every Industry and Discipline.

Quality of Service
- Our most distinct advantage is the quality of the services we provide.
- Our professionals have met the most demanding standards in the industry
- We have standardized Quality Control and Quality Assurance procedures
- All projects are management by industry experts and overseen by senior management

Federal Government Service Center
MPF’s dedicated Federal Government Service Center
- Centralizes the resources needed to manage Federal Government contracts
- Offers complete Task Order management
- Monitors the terms of contract to maintain compliance with the U.S. Department of Labor (DoL) Service Contract Act (SCA), Federal Acquisition Regulations (FAR’s), and discretionary time policies

Ability to Recruit Qualified Experts
Through our professional services, you’ll experience the following advantages:
- Promptly staff, even the most challenging positions. We hire the right people with the right skills and experience for the job.
- Successfully provide highly knowledgeable and skilled personnel to support all requirements.
- Actively monitor personnel performance in challenging mission critical environments. Provide ongoing training and development opportunities to our employees for continued job satisfaction.
- Effectively retain the most qualified staff despite demanding shift work, travel, and the competitive environment for qualified personnel.

(M) 571-345-5157
meghan.mitchell@sebapro.com
Introduction

Select Computing, Incorporated (SCI) is a management and technology consulting firm that provides innovative solutions for client success.

SCI is a Capability Maturity Model Integration (CMMI) Maturity Level 4 appraised company, for both the Development and Services models. SCI, a Small Disadvantaged Business (SDB), has more than 20 years of experience as a systems integrator, focused on Federal Health Information Technology, with expertise in program management, legacy systems modernization, data management, and infrastructure management. We bring expertise in enterprise architecture where an agency seeks to replace a system and implement new business processes. SCI is a certified HUBZone small business concern (SBC).

Our customers include the Centers for Medicare & Medicaid Services (CMS) (since 2003), Small Business Administration (SBA), Department of Veterans Affairs (VA), Food and Drug Administration (FDA), Securities and Exchange Commission (SEC), and a number of state agencies, including the Minnesota Department of Human Services (DHS).

Service Areas

Health Information Technology Services. SCI is a proven systems integrator (SI) that is focused on healthcare, with a successful core competency in legacy systems modernization. Our experience includes providing technical support and project management services for Federal Health IT programs. We provide the right combination of processes and technologies to maintain, support, enhance, and upgrade healthcare systems. For more than 14 years, SCI has provided systems analysis, design, database support, programming, data analysis, and system documentation for Federal healthcare programs. In 2018, SCI was awarded a contract to support the Minnesota Medicaid Management Information System (MMIS) Modernization initiative.

Financial Services Information Technology. SCI offers experience based insights and knowledge of financial systems modernization, processes, policies, and regulations. SCI is providing all IT and business modernization services to support a Federal Agency’s debt collection center’s initiative to modernize two of its legacy IT systems and their associated databases. SCI is responsible for the entire scope of this modernization effort: redesign, development, and implementation of the new and enhanced systems. For another customer, SCI played an integral role in the agency’s initiative to manage and modernize its legacy COBOL-based application systems and its core loan financial management system.

Systems Modernization. Many agencies and organizations continue to rely on legacy systems to perform mission-critical functions. In an ever-changing IT landscape, executives are recognizing the urgency for systems and data modernization. SCI has proven successes in performing systems and data modernization for federal clients. Our modernization approach begins at the enterprise architecture, allowing you to determine the best investment strategy. SCI re-conditions your IT system so that it functions effectively and you can apply application lifecycle management best practices. The scope of modernization ranges from code improvement to re-engineering to integration.
Program Management. SCI provides a robust program management capability appraised at CMMI Maturity Level 4. We specialize in blending and leveraging the flexibility of the Agile approach with the predictability of the CMMI Maturity Level 4 processes, ITIL, and PMBOK best practices. As a result, our clients get the unique benefits of both Agile and service management best practices.

Data Management/Big Data. Data is the foundation of the enterprise. SCI provides a comprehensive approach to managing data, whether it remains in its current state or it is migrated to a new platform. Our approach helps you define your data management strategy, data operations standards, data quality surveillance, data standards, data sourcing, and data distribution. SCI is a Cloudera Silver Partner.

IT Infrastructure Management. SCI has managed IT infrastructure for more than 20 years. SCI provides service management, including database and systems administration. We operate according to CMMI Level 4 standards and follow an ITIL-compliant approach. We offer Cloud hosting for your infrastructure in a highly secure environment that meets FISMA requirements.

Representative Experience

With our experience applying innovative approaches at CMS and across federal civilian agencies, SCI has developed a deep understanding of health IT systems in the federal space and of CMS’s unique needs and challenges. Since 2003, SCI has worked on CMS systems, databases, related subsystems, and application projects. We are the incumbent contractor for the CMS Oracle/SQL Services Database Administration (DBA) and CMS WebSphere MQ/Replication contracts.

In addition to CMS, SCI has extensive experience performing maintenance, enhancement, and IT modernization for other federal clients. We are the incumbent contractor on the VA Debt Management Center Modernization project. We were the prime contractor on the SBA Legacy Systems Modernization project. SCI is the prime contractor on the Minnesota Medicaid Management Information System (MMIS) Modernization initiative.

SoftDev is a full-service IT services company offering subject matter and technical expertise in Program/Project Management, Systems Development, Operational Support, and Data Services within HHS. We expertly integrate CMMI-DEV ML3 processes, DevSecOps, SAFe, Agile, and LEAN in alignment with the HHS EPLC, CMS Expedited Lifecycle and other federal governances to streamline system operations and produce accurate and actionable data with real world impacts to the HHS mission goals of better, more economical and accessible healthcare for our nation.

Core Competencies

Health IT Services
✓ Agile Program and Project Management
✓ Full Life Cycle Systems Development
✓ Cloud Implementation
✓ Requirements Management
✓ Operational Support
✓ Business Analysis

Data Management Services
✓ Data Governance
✓ Data Management Support
✓ Data Quality Support
✓ Data Analytics and Reporting
✓ Program Evaluation
✓ Help Desk Support Services

Corporate Capabilities

Highlighted Accomplishments and Recognition Within HHS

✓ Exceptional CPARS Evaluations on two iterations of CDDS
✓ Rated 97 of 100 on Dunn & Bradstreet Open Ratings Past Performance
✓ CMMI-DEV ML3 with zero weaknesses across two SCAMPI-A appraisals
✓ Ranked among America’s fastest growing companies by Inc. 5000
✓ Led by Robin Kaiser, recipient of 2018 FedHealth IT Top 100 Award
✓ Successful HCQIS Cloud, Data Lake, and Atlassian implementation using SAFe/Agile
✓ Inter-agency Medicare Advantage Plan data reconciliations that resulted in more than $50M (to-date) in recovered revenues for health plans with ESRD beneficiaries
✓ Presented process refinements of the Medicare Advantage Plan Workflow Process to the CMS Fed Biz Lean team
✓ Recommended the 2017 transition to use CROWNWeb clinical data in place of Claims data for ESRD Quality Incentive Program measures
✓ Recognized status as a Subject Matter Expert in ESRD Program data

Received 2018 FedHealthIT award for integrating performance data into operational enhancements for innovative support of clinical measures during 2017 Hurricanes Harvey and Irma along with California wildfire disaster areas. Selection for this honor was made by government healthcare leaders spanning CMS, HHS, Veterans’ Affairs, and Military/Defense Health.
